CECOM MISSION
Empower the Soldier through sustained C5ISR readiness. Anytime. Anywhere.

CECOM VISION
Enabling lethality is our business. Our bottom line is the Soldier. We do what is best for the Soldier in the fight.

AFCEA Luncheon
18 December 2019
“The difference between being ready and reacting will be measured in the number of lives lost.”
—GEN Perna
Calibrated force posture is the combination of position and the ability to maneuver across operational and strategic distances. Consists of forward presence forces, expeditionary forces, national-level capabilities, and authorities.*

Multi-domain formations possess the combination of capacity, capability, and endurance, which generates the resilience necessary to operate across multiple domains. All Army formations must have the capability to conduct independent maneuver, employ cross-domain fires, and maximize human potential.

Convergence is the rapid and continuous integration of capabilities in all domains that optimizes effects to overmatch the enemy through cross-domain synergy and multiple forms of attack, all enabled by mission command and disciplined initiative.

*Aligns with NDS Dynamic Force Employment concept and Global Operating Model of “contact/blunt/surge forces.”
The Strategic Support Area (SSA) of MDO

Defining the SSA*

• The SSA consists of the area of cross-Combatant Command coordination, strategic sea and air lines of communications, and the homeland.

• Joint logistics and sustainment functions required to support MDO campaigning throughout competition and armed conflict emanate from the Strategic Support Area.

Operationalizing the SSA

The battlefield has expanded in:

• Time or phases not traditionally defined by the United States as “war”

• Domains – space, cyberspace and the electromagnetic spectrum – which are limitless

• Distance and space, eliminating sanctuaries and allowing the simultaneous engagement of the entire depth of the battlefield

• Actors, which include states, proxies, and violent extremists

*TRADOC PAM 525-3-1, The U.S. Army in Multi-Domain Operations 2028, Version 1.5 (6 December 2018)
CECOM Strategic Support Area Contributions

7 Strategic Focus Areas

1.0 Soldiers, Civilians & Family Readiness

2.0 Installation Readiness
- 2.3 Provide and maintain facilities and infrastructure ISO Army priorities

3.0 Industrial Base Readiness
- 3.1 Plan & Execute Performance to Promise (P2P)
- 3.2 Implement OIB Modernization Plan in Support of 2028 MDO Capable Force
- 3.3 Integrate with CFTs IOT Shape Sustainability of Requirements

4.0 Munitions Readiness

5.0 Strategic Power Projections

6.0 Supply Availability & Equipment Readiness
- 6.1 Implement Common ASL Capability
- 6.2 Implement DOD Supply Chain Risk Management Best Practices to Support 2028 MDO Capable Force
- 6.3 Develop/Implement Predictive Maintenance Capability (e.g., Predictive Maintenance)
- 6.6 Expand Repair Cycle Float Capability
- 6.7 Identify & Codify Surge Requirements

7.0 Logistics Information Readiness
- 7.2 Transition GCSS-A & AESIP Hub to Shared Service Model

Enablers

- Depot Facility Modernization
- Hiring and Retention
- Manpower Initiatives
- Field Support Reform
- Asset Management

Operational Support Area
- Depot Maintenance Forward (OCONUS)
- Repair Cycle Floats
- Field support
- Forward Repair Activity
- Software delivery
- GCSS-A

Tactical Support Area
- Field support
- Forward Repair Activity
- Software delivery
- GCSS-A

Close Area
- C5ISR readiness
- Field support
- Software delivery
- GCSS-A
CECOM ITN Sustainment: 5-3-1

Program of Record (POR) Baseline Systems
- Path to Sustainment: Traditional
- Comprised of DOD 5000 Systems
  1. Traditional POR systems provide the network backbone for the ITN
  2. Validate Transition to Sustainment (T2S) schedule

Non-Standard Equipment (NSE)
- Potential Path to Sustainment: 5-3-1 Framework
- Comprised of Middle-Tier Acquisition Systems (Section 804)
  1. Objective 5-year warranty for HW & SW
  2. Year 3 decision determines whether capability is enduring; initiate plan for T2S
